xtable & kableExtra

Hao

2/13/2019

Recent versions of kableExtra (since 1.0) offers a function `xtable2kable`, which, as suggested by its name, turns a `xtable` object to a `kable` object so you can use functions in kableExtra after that. I tested some basic examples and it seem to work.

```r
library(xtable)
library(kableExtra)

xtable(mtcars[1:5, 1:5]) %>%
  xtable2kable() %>%
  column_spec(1, color = "red")
```

	mpg	cyl	disp	hp	drat
Mazda RX4	21.00	6.00	160.00	110.00	3.90
Mazda RX4 Wag	21.00	6.00	160.00	110.00	3.90
Datsun 710	22.80	4.00	108.00	93.00	3.85
Hornet 4 Drive	21.40	6.00	258.00	110.00	3.08
Hornet Sportabout	18.70	8.00	360.00	175.00	3.15

```r
xtable(mtcars[1:5, 1:5], caption = "Some long caption") %>%
  xtable2kable(caption.width = "10em") %>%
  column_spec(1, color = "red")
```

	mpg	cyl	disp	hp	drat
Mazda RX4	21.00	6.00	160.00	110.00	3.90
Mazda RX4 Wag	21.00	6.00	160.00	110.00	3.90
Datsun 710	22.80	4.00	108.00	93.00	3.85
Hornet 4 Drive	21.40	6.00	258.00	110.00	3.08
Hornet Sportabout	18.70	8.00	360.00	175.00	3.15

Table 1: Some long caption
